GRAM SERIES

HIGH-EFFICIENCY RIGHT-ANGLE RETURN MEDIA AIR CLEANER

The Goodman® High-efficiency, Right-Angle Media (RAM) Air Cleaner is designed to remove very small airborne contaminants. In addition, the GRAM Series helps protect and prolong the operating efficiency of any heating and cooling equipment.

Standard Features

- High-efficiency MERV 11 Media Filter removes air contaminants down to 0.3 micron
- MERV 11 Rated Efficiency (ASHRAE Standard 52.2)
- Eliminates the need for a 90° duct adapter because it works as a turning vane to provide even distribution across the media filter; reduces installation space by 6" to 8"
- Reversible airflow
- Engineered construction empowers an electrostatic charge, combined with structural density, that yields a higher initial efficiency and maintains high efficiency over the life of the filter
- Perfect-fit filter allows no air gaps and helps the system's ability to clean the air
- User-friendly, easy-to-change filter
- Adjustable inlet duct opening replaces need for field-forming transition, significantly reducing installation time

Cabinet Features

- Heavy-gauge galvanized steel cabinet
- Two access doors allow versatile installation and easy maintenance
- Pre-drilled holes facilitate mounting the unit to duct work or air-handling system
- Durable powder-coat paint finish on doors helps cabinet resist corrosion

Accessories

- Replacement Filters (Part #M8-1056)
(For optimal performance of the air cleaner, replace filters 1 to 3 times per year depending on climate or home renovations. Quantity: packaged 3 per box.)
